Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **Thorough Peer-Review**
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
- **High Visibility** Indexed within Scopus, SCIE (Web of Science), Inspec, and other databases
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Rapid Publication** Manuscripts are peer-reviewed and a first decision provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2022)
- **Journal Rank** JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
Aims and Scope

The scope of *Machines* includes:

- Applications of automation
- Systems and control engineering
- Electronic engineering
- Mechanical engineering
- Computer engineering
- Mechatronics
- Robotics
- Industrial design
- Human-machine-interfaces
- Mechanical systems, machines and related components
- Machine vision
- History of technology and industrial revolution
- Turbo machinery
- Machine diagnostics and prognostics (condition monitoring)
- Machine design
