Message from the Editor-in-Chief

Galaxies provides an advanced forum for studies related to astronomy, astrophysics, and cosmology, including all of their subfields. Different formats, such as specialized research articles, reviews, communications and technical notes are welcomed. Manuscripts containing original and creative research proposals and ideas are especially appreciated.

We encourage scientists to publish their astronomical observations and theoretical results in as much detail as possible. There is no restriction on the paper length and full experimental and methodological details, as applicable, should be provided. All papers will be peer reviewed promptly. On behalf of the distinguished members of the editorial board, I extend my welcome to all researchers working on these subjects to contribute to Galaxies.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the maximum length of the papers, number of figures or colors
- **Journal Rank** CiteScore - Q2 (Astronomy and Astrophysics)
- **Coverage by Leading Indexing Services** Scopus, ESCI (Web of Science), Astrophysics Data System, INSPIRE, Inspec, and other databases
- **Rapid Publication** First decision provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the second half of 2022)
Aims and Scope

Our aim is to offer to the interested authors the advantages of a fast and very professional publication of their results, in particular those containing original and creative research proposals and ideas. We encourage scientists to write down their astronomical observations and theoretical results in detail. There is no restriction on the length of the manuscripts.

The scope of *Galaxies* includes:

- Astronomy
- Astrophysics
- Cosmology
- Observational astronomy (Radio, Infrared, Optical, X-Ray, Neutrino, etc.)
- Planetary science
- Astronomy equipment and technologies
- Aerospace engineering
- Astronomical data analyses
- Astrochemistry and astrobiology
- Archaeoastronomy
- History of astronomy and cosmology
- Philosophical issues in cosmology
