Welcome to Sclerosis.

Sclerosis (from the Greek sklērós, “hard”) is a term that encompasses a variety of conditions that involve the stiffening and scarring of tissues and organs. It is a pathologic process of some highly prevalent diseases, such as multiple sclerosis, glomerulosclerosis, atherosclerosis, and more rare diseases, such as amyotrophic lateral sclerosis, systemic sclerosis, tuberous sclerosis, and others.

These diseases affect millions of people worldwide and pose significant challenges for diagnosis, management, and research.

Sclerosis aims to provide a platform for the dissemination of cutting-edge research and clinical practice in this field. Looking to similarities and differences among “sclerotic” diseases, we aim at identifying shared pathological mechanisms and risk factors, management pathways, and drugs with repurposing potential, as well as discovering potential avenues for preventive and therapeutic strategies.

We believe that Sclerosis will become a valuable resource for the scientific and medical communities, as well as for patients and caregivers.

Aims

Sclerosis (ISSN 2813-3064) is an international and interdisciplinary peer-reviewed open access journal, published quarterly online by MDPI. Sclerosis provides an advanced forum for studies on all aspects of sclerosis and related diseases. It publishes research papers, reviews, and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Dr. Maurizio A. Leone
Scope
- Amyotrophic lateral sclerosis
- Atherosclerosis
- Focal segmental glomerulosclerosis
- Hippocampal sclerosis
- Lichen sclerosus
- Multiple sclerosis
- Osteosclerosis
- Otosclerosis
- Primary lateral sclerosis
- Primary sclerosing cholangitis
- Systemic sclerosis
- Tuberous sclerosis

Author Benefits
Open Access
Unlimited and free access for readers

Discounts on Article Processing Charges (APC)
If you belong to an institute that participates with the MDPI Institutional Open Access Program

Rapid Publication
First decisions in 16 days; acceptance to publication in 5.8 days (median values for MDPI journals in the first half of 2024)
