Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal Environments, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

- **Open Access**  free for readers, with article processing charges (APC) paid by authors or their institutions
- **High Visibility**  Indexed within Scopus, ESCI (Web of Science), AGRICOLA, AGRIS, GeoRef, and many other databases
- **Journal Rank**  CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
- **High Visibility**  Manuscripts are peer-reviewed and a first decision provided to authors approximately 20.2 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2021)
Aims and Scope

*Environments* (ISSN 2076-3298) is an international and cross-disciplinary scholarly, open access journal focusing on the advances, issues and challenges related to environmental systems. Our aim is to encourage scientists and engineers to publish their experimental, theoretical, novel practical results in a variety of areas that range from environmental conservation, environmental technologies, ecosystem services, risk, policy, governance, monitoring and modelling of environmental systems, stakeholder engagement and decision support. There is no restriction on the length of the papers. The full experimental details must be provided with the basic QA so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in Word/LaTeX format, can be deposited as supplementary electronic material.

Subject Areas

- Environmental conservation
- Environmental technologies and methodologies
- Environmental protection and pollution prevention
- Environmental modeling and technology
- Environmental management and policy
- Environmental impact and risk assessment
- Environmental change and conservation
- Environmental analysis and monitoring
- Ecosystem services, biodiversity and natural capital
- Environmental economics
- Development and application of environmental data, information, tools and decision support systems
