Author Benefits

Open Access Unlimited and free access for readers
No Copyright Constraints Retain copyright of your work and free use of your article
Thorough Peer-Review
Discounts on Article Processing Charges (APC) If you belong to an institute that participates with the MDPI Institutional Open Access Program
No Space Constraints, No Extra Space or Color Charges No restriction on the length of the papers, number of figures or colors
Coverage by Leading Indexing Services Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and many other databases

Message from the Editors-in-Chief

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*’s (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal’s full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
Aims and Scope

The *Journal of Clinical Medicine* (ISSN 2077-0383), is an international scientific open access journal, providing a platform for advances in health care/clinical practices, the study of direct observation of patients and general medical research. This multi-disciplinary journal is aimed at a wide audience of medical researchers and healthcare professionals.

Unique features of this journal:

- Original research articles are particularly welcomed. Systematic reviews are also accepted.
- Since 2019, pre-clinical studies using animal models are not accepted except for invited articles.
- Since 2019, case reports are not considered anymore.

The scope of *JCM* includes:

- Clinical laboratory diagnosis and therapy of internal medicine diseases
- Traumatology and precise surgical techniques
- Genomics, proteomics, and bioinformatics in clinical cancer research
- Epidemiology
- Neurological and psychiatric disorders
- Advanced research in dermatology and venereology
- Ophthalmology and otolaryngology
- Medical imaging and nuclear medicine
- Rehabilitation medicine and physiotherapy
- Sports medicine
- Pediatric and geriatric emergency care
- Women’s health
