Error in Figure

In the original publication [1], there were mistakes in Figure 1 as published. The scale bars, as well as the figure panel numbers, were missing in Figure 1. In addition, the left panel was presented twice. The corrected Figure 1, with the appropriate scale bars, panel labels, and updated figure caption, appears below.

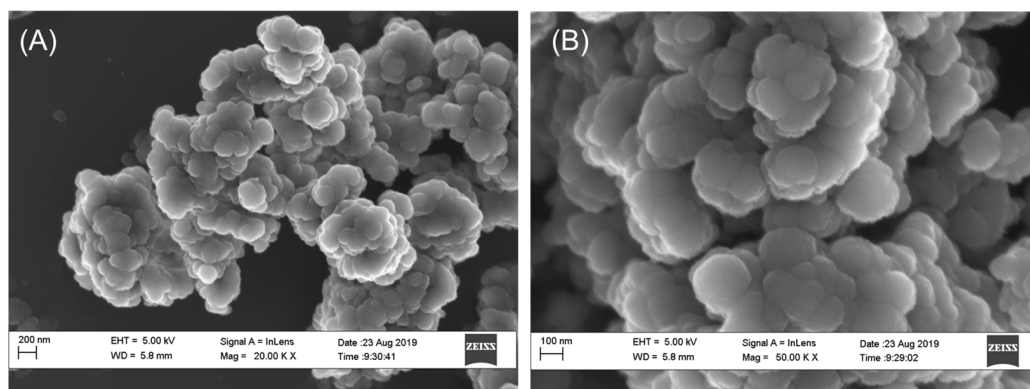

Figure 1. SEM micrographs of dry Ag-NPs at (A) 20,000 $\times$, and (B) 50,000 $\times$. The synthesized Ag-NPs were agglomerated and approximately spherical in shape.

Text Correction

There was an error in the original publication [1]. A correction has been made to Section 2.1, in the first sentence:

The synthesized Ag-NPs were approximately spherical with an average particle size of 113.389 ± 22.964 nm (Figure 1) and a surface area of 7.5329 m²/g.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
