The authors would like to make the following correction to the published paper [1]. We have deleted the detailed information regarding the procedure of isolating and identifying germacranolides from *S. balsamita*, which was included in Section 3.2 and the Supplementary Files (Tables S1 and S2) and refer to the data in our previous paper [14] (in the original publication). We have added the following sentence at the end of the first paragraph in Section 3.2:

The data on the isolation and structural elucidation of compounds 1–7 are described in detail in our previous work [14].

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
