Error in Figure

In the original publication [1], there was a mistake in Figure 5 as published. Figure 5C,D showed high doses of the TYRP group. This was a mistake made during the process of organizing the results. The corrected Figure 5 appears below.

Figure 5. Administration with TRYP inhibited the expression of NF- κ Bp65, magnification $\times 400$. (A) Immunohistochemistry result of control group with expressing NF- κ Bp65 barely. (B) The expression level of NF- κ Bp65 increased sharply with crypts and goblet cells disappeared. (C) Immunohistochemistry result of sulfasalazine control. (D–F) The expression level of NF- κ Bp65 with different concentrations of TRYP treatment. (G) The column heights represented the positively stained cell rates. Error bars represented means $\pm$ SEM of $n = 3$, ** $p < 0.01$ compared with colitis (see Supplementary Materials).

Addition of Supplementary Materials

The original data of Figure 5G has been added under the Supplementary Materials based on the Academic Editor's suggestions. This section is as follows:

Supplementary Materials: The following supporting information can be downloaded at <https://www.mdpi.com/1420-3049/23/5/1062/s1>.

The citation of it has been added in the caption of Figure 5G, as above.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
