In the original publication [1], there was a mistake in Figure 8. During paper submission, in Figure 8A, a mismatch error in the (4×–10×) coronal sections of three panels, at the III, VI, and VIII treatment levels, took place. The new corrected treatment panels—III, VI, and VIII—for Figure 8A appear below. The authors state that the scientific conclusions are unaffected by the above error. This correction was approved by the Academic Editor. The original publication has also been updated.
