The authors wish to make the following change to their paper (Akosah-Twumasi et al. 2020). The materials and methods under section “Data Analysis” incorrectly references a paper (Charmaz 2014). The correct version of Section 2.4. “Data Analysis” is as follows:

2.4. Data Analysis

The analysis process followed Corbin and Strauss’s three phases of coding: open, axial, and selective (Corbin and Strauss 1990). In open coding, the transcribed interviews were examined line-by-line to develop the initial coding for descriptive categories. Axial coding was carried out to establish the relationships between the developed categories (Corbin and Strauss 1990).

Conflicts of Interest: The authors declare no conflict of interest.
