Section Information

The Exposome Analysis and Risk Assessment section of the journal is focused on new findings, communications and opinions related to how to assess the risks of environmental pollutants for the human population and/or the natural environment, as well as the development of alternative approaches to manage and mitigate these risks. This section invites the submission of manuscripts and reviews covering a wide broad of risk assessment and management aspects, such as new regulatory guidelines, novel methodological frameworks, and new modelling approaches. Case-studies targeting legacy and emerging pollutants in specific geographical regions, as well as large scientific investigations, are very welcome.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

2025 Impact Factor: 4.9

(*Journal Citation Reports* - Clarivate, 2026)

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

Journal Rank

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases

Rapid Publication

A first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026)
