Section Information

The Reproductive and Developmental Toxicity Section of *Toxics* focuses on the presentation of studies on the reproductive and developmental toxicity of environmental exposure to toxicants. This Section invites submissions of high-quality manuscripts reporting on investigations of all aspects of the relationships, and their biological mechanisms, between toxicant exposure and outcomes of sexual function and fertility in adult males and females as well as the development of offspring. The exposures may include, but are not limited to, environmental or occupational exposure to, e.g., pesticides, industrial chemicals, metals, air pollution, and emerging environmental pollutants. This Section also welcomes submissions on the exploration and application of frontier experimental methods and statistical models in toxicology. Reviews and commentaries are also welcome in this Section.

Section Editor-in-Chief
Prof. Dr. Yankai Xia

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

2025 Impact Factor: 4.9

(*Journal Citation Reports* - Clarivate, 2026)

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

Journal Rank

JCR - Q1 (Toxicology) / CiteScore - Q1 (Chemical Health and Safety)

Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases

Rapid Publication

A first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2026)
