Who we are

MDPI is an academic open access publisher based in Basel, Switzerland and was initially founded in 1996 to collect and preserve rare chemical research samples. To support the samples project, MDPI started the journal *Molecules* (ISSN 1420-3049) the same year.

Since 1996, MDPI has grown into a publishing house with more than 470 diverse open access journals backed by over 215'000 expert reviewers and 67'000 editorial board members. In 2024, MDPI published over 238'000 articles.

More than 95% of content is available within Web of Science, with 92 journals indexed in the Science Citation Index Expanded (SCIE) and 7 journals in the Social Science Citation Index (SSCI), which include 2 journals indexed in both databases. Moreover, 220 journals are indexed in the Emerging Sources Citation Index (ESCI) and one in the Arts and Humanities Citation Index (AHCI). Furthermore, as of July 2025, 343 journals are covered within Scopus, 94 journals are indexed in PMC and PubMed, including 18 within MEDLINE.

All our content is open access, distributed under a Creative Commons License, and hence freely accessible to readers. We finance publication through article processing charges (APCs), paid by authors and their institutions. APCs charged by MDPI are highly competitive while enabling us to reinvest by supporting journals and launching services to support researchers.

As a member of COPE (Committee on Publication Ethics), STM (International Association of Scientific, Technical, and Medical Publishers) and OASPA (Open Access Scholarly Publication Association), MDPI enforces rigorous peer review and adheres to strict ethical policies and standards.

MDPI partners with over 190 societies in a variety of ways to support scholarly communities and broaden the reach of open access.

Our Core Values:

Simplicity
Sustainability
Credibility

What we offer

Experience

Almost 30 years of open access publishing experience.

Professionalism

Professional editorial staff to give a high level of administrative support to each journal.

Speed

Rapid publication, standardized systems: a first decision was provided in 2024 in approximately 18 days; once accepted, papers are published within approximately one week. The median time taken from submission to publication of an article is 5-6 weeks.

High Capacity

High Capacity to manage large volumes of publications, with more than 238'000 articles published in 2024.

Visibility

Journals published by MDPI received more than 6.6 million monthly webpage views in 2024 (157M annual views), with the MDPI platform (mdpi.com) attracting more than 55.9 million users.

Services

Highly efficient in-house editorial production and professional in-house English editing.

Services

MDPI offers flexible services to meet the needs of your society and your journal(s).

Publish your Existing Open Access Journal with MDPI, or Transition a Subscription Journal to Open Access

MDPI can act as your publishing partner and collaborate with you to make your open access journal a success. You will benefit from almost 30 years' experience in running open access journals and the full support of our editorial and production teams, while maintaining full control over editorial decisions and content.

Establish a New Journal

We have started over 430 open access journals in all disciplines and can bring this experience to launching your own journal. Our editorial staff will handle all of the technical aspects of the setup and support you in finding those all-important first manuscripts.

Affiliate with an MDPI Journal

You can offer your society members the benefits of open access publishing without having to set up a full publishing operation, by affiliating with an existing MDPI journal.

Society members enjoy a discount on the APC of the affiliated journal and MDPI will handle all aspects related to publishing. An MDPI affiliated journal may consider engaging with marketing activities such as sponsorship of the annual society conference or other events, travel grants, awards and more.

Our scholar-focused initiatives are offered with preferential rates or for free to the society and society members: SciForum (webinar and conferences platform), Proceedings Series, MDPI Books, etc.

Society members benefit from a 15% discount on Author Services language editing. Let Author Services prepare your manuscript for publication, with certified, professional language editing delivered by PhD-qualified English editors. Our team provides extensive editing to improve the English grammar, tone, and style of your manuscript, ensuring that your ideas are expressed clearly and your research stands out. Additional services such as Figure and Format editing are also available.

Provide Publishing Services through JAMS

Through our Journal and Article Management System (JAMS), we offer outsourced publishing services to support specific aspects of your publishing operation. Our services include a fully-functioned online submission website, professional production services, and customized journal websites.

Features

Depending on the option you select, MDPI's services can include the following features. If you would like to discuss a specific option further, or if an option you are interested in is not listed here, please get in touch with us:

Conversion to Open Access

We can convert a subscription-based journal to open access, maintaining a high number of publications and a sustainable income.

Strategic Development of your Journal

A dedicated field-specific Managing Editor will support your organization and the Editor-in-Chief in the management of the journal by providing regular progress reports on the journal, conducting field-specific market research and competition analyses relevant to your journal, providing annual financial reports, and working closely with you to agree on areas for strategic development.

Editorial Handling of Manuscripts

Our trained and professional editorial staff take care of all administrative tasks related to manuscript submissions, the peer review process, and post-acceptance production. MDPI can provide editorial assistants to support all administrative aspects of managing and running the journal, including inviting reviewers, corresponding with authors, and requesting editorial decisions from Editorial Board Members. Throughout the process we ensure that you maintain full editorial control.

Professional Production Services

Our in-house production team handles copy-editing, English editing, conversion to and tagging of full-text and XML versions, and professional production of PDF versions for online publication. We can handle submissions created in Microsoft Word or LaTeX. We create attractive, readable articles with fast production times.

Fast Editorial Procedure

In 2024, across all articles published by MDPI, the average time for a first decision was 18 days and the average time from submission to publication was 47 days. Due to our infrastructure, internal organization, and large team of editorial support staff, MDPI maintains one of the fastest and most straightforward procedures in the industry.

Fast and Easy-to-Use Platform

As well as hosting journals, mdpi.com incorporates an electronic submission and reviewing system, including a workflow from manuscript submission to editorial processing (peer review, revisions, decision-making), copy-editing and proofreading, XML conversion, author invoicing, and final publication. The platform is linked with a growing number of services, including Altmetric, CrossRef and hypothes.is.

High Visibility

We offer high visibility for your publications by listing them in the search results at mdpi.com, which currently attracts over 157 million page views per year. A high ranking on Google and other major search engines is essential, so we ensure full-text indexing and search engine optimization by Google.

Automated Data Exchange

MDPI will automatically register DOIs (Digital Object Identifiers) with Crossref for all published items, as well as automatically deposit publications into all databases in which the journal is covered within, in which a deposit feed is set-up.

Indexing and Abstracting Services

MDPI strives to continuously expand coverage of our publications within leading multidisciplinary databases, such as Web of Science, Scopus, EBSCO and ProQuest. We also focus on ensuring coverage of our journals within as many scope specific databases as possible, such as the databases of the U.S. National Library of Medicine (PMC, PubMed, and MEDLINE), Engineering Village's databases, Chemical Abstracts (CAS), Food Science and Technology Abstracts (FSTA), and many more. As of 2025, MDPI's journals are actively covered in more than 60 indexing and abstracting databases, 10 international ranking platforms and 10 journal directories.

Marketing and Promotion of the Journal

MDPI offers promotion and marketing activities for the journal, such as conference sponsorship, digital marketing and stakeholder communication at conferences, flyers, and newsletters.

Conferences Organization

MDPI has the infrastructure and expertise to organize conferences. Societies, organizations, or individuals have the possibility to organize their own conferences using the MDPI infrastructure. You can see examples of previously organized conferences at sciforum.net/conferences.

Long-Term Preservation

MDPI will take care of the long-term archiving of your publications by depositing a full copy in the Swiss National Library electronic collection (Helvetica) and CLOCKSS. MDPI is a member of the Open Archives Initiative (OAI), which enables the distribution of additional copies of publications to university archives around the world. Authors are also encouraged to self-archive the final version of their published articles into institutional repositories.

Hosting the Journal Back-File

In many cases, MDPI can host your journal back-files online on its platform, so that all volumes and issues of the journal are searchable from the same location.

Retaining Ownership

Your organization can retain full ownership of your journals. MDPI operates the publication process on your behalf. Other models are possible and can be discussed.

Income

MDPI can take care of the whole invoicing process, collecting article processing charges on behalf of the journal. We offer a number of different financial models and are open to negotiate terms and conditions.

High-Quality Reprints

MDPI offers high-quality, on-demand reprints of any article, volume or Special issue to authors and readers of a journal. Special issues can also be published in book format and be made available on demand.

Reviewer Benefits

MDPI has a partnership with Publons to recognize the important work of reviewers. Reviewers can opt in to get credit when reviewing for MDPI journals. Publons provides a number of benefits to reviewers, including generating certificates attesting the reviewers experience, and managing data and links to other services such as ORCID. MDPI also offers vouchers (a discount on the publication fee) to reviewers and publishes a reviewer acknowledgement every year.

Institutional Partnerships

MDPI offers institutions and consortia the opportunity to join over 900 institutions on our Institutional Open Access Program (IOAP), which provides transparency to the MDPI submission process, access to a unique institutional dashboard environment, and an APC discount for affiliated researchers. With flexible agreement models that offer a variety of payment workflows, MDPI can cater to individual institutional needs in order to help simplify administrative processes.

Optional Services

We offer a flexible approach and we can discuss and accommodate any other specific needs required by an organization.

Journals currently published by MDPI on behalf of societies, associations and faculties

- Medicina
- International Journal of Geo-Information (IJGI)
