Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format-research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief
Prof. Dr. David J. Wright

Aims

Pharmacy is an open access journal which provides an advanced forum for studies on all aspects of pharmacy education and practice. It publishes original articles, reviews, communications, and case reports. Our aim is to encourage practicing pharmacists and healthcare professionals, academic researchers, and scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that results can be reproduced. Electronic files or software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

Scope

Pharmacy Education and Student/ Practitioner Training

- Pre-registration and post-registration pharmacy education and training;
- The philosophy, production, and use of competence frameworks, and experience with competence-based pharmacy education and training;
- Curriculum design and assessment, innovations in teaching and learning, interprofessional learning;
- Continuous professional development, revalidation, roles of the employer and employee;
- The interaction and integration of teaching with health services.

Pharmacy Practice and Practice-Based Research

- Social, behavioral, clinical, community, and ambulatory care pharmacy;
- Advanced and specialized pharmacy practice;
- Pharmacy services and implementation science;
- Pharmaceutical care and clinical pharmacy practice;
- Health system and managed care pharmacy practice;
- Pharmaceutical public health and community health;
- Patient access, affordability, adherence, education, equity, experiences, and inclusion;
- Pharmacy workforce;
- Pharmacy analytics, informatics, and technology;
- Pharmacy economics, regulations, and policy.
