Message from the Editor-in-Chief

Methods and Protocols (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics, Earth Sciences, and Environmental Research will be rapidly incorporated.

Aims

Methods and Protocols (ISSN 2409-9279) is a multidisciplinary peer-reviewed scientific journal that provides an advanced forum for the publication of novel approaches to tackle questions in the fields of Life Sciences, Chemistry, and Biomedical Sciences as well as in other relevant scientific fields. Our aim is to encourage scientists to publish new protocols based on established techniques as well as significant improvements and developments of cutting-edge methods. For all articles, background information to understand the underlying principles, full experimental details, and comparison with available protocols/methods must be provided. Scientists are encouraged to provide accompanying video demonstrations, which will be published online, for ease of reproducibility.
