Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Aims

Separations covers all areas of separation and purification, including theory and methodology, equipment and techniques, and computational modeling. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. The full experimental details must be provided so that the results can be reproduced.

Scope

- Chemical Separation and Characterization
- Natural Products Separation
- Pharmaceutical Separation
- Environmental Separation and Monitoring
- Materials in Separation Science
- Separations in Energies
- Purification Techniques and Technology
- Food and Beverage Separation
- Toxicity Separation and Assessment
- Chromatography and Separation Methods
- Biochemical and Biomolecular Separation
- Forensic and Medical Separation
