Message from the Editor-in-Chief

The field of osteology is rapidly evolving. Recent discoveries have transformed our understanding of bone metabolism, healing mechanisms, and the management of skeletal disorders. A deeper insight into the biological and clinical processes underlying bone repair and regeneration offers new opportunities to enhance patient care and therapeutic strategies.

Osteology was established with this vision in mind. *Osteology* is an international, peer-reviewed, open access journal dedicated to basic and clinical research in bone science, published quarterly online by MDPI. Supported by a dynamic scientific community, the journal is committed to excellence through a rigorous and transparent peer-review process.

We invite researchers worldwide to submit high-quality clinical and experimental studies to advance innovation and knowledge in osteology.

Editor-in-Chief

Prof. Dr. Umile Giuseppe Longo

Aims

Osteology (ISSN 2673-4036) is an international, peer-reviewed open access journal devoted to the basic and clinical research of bone science. Specifically, the journal is interested in original research on bone-related diseases and their molecular mechanisms, biological and physiological research on bone, interactions of bone with other organ systems, bone biomaterials, as well as methodological advances in osteology. *Osteology* publishes a variety of article types including research papers, reviews, editorials, communications, etc. There is no restriction on the maximum length of the papers, and we encourage scientists to publish their results in as much detail as possible.

Scope

- Bone-related diseases, including arthritis, fractures, infections, osteoporosis, tumors, etc.
- Molecular mechanisms research on bone and bone-related diseases
- Interactions of bone with other organ systems, including cartilage, muscle, neural, etc.
- Biological and physiological research on bone, cartilage, joints, and spine
- Clinical studies
- Methodological advances in osteology
- Bone biomaterials
- Interactions of bone with prosthesis
- Bone mechanics

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

A first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.7 days (median values for papers published in this journal in the second half of 2025)
