**Editor-in-Chief**

Prof. Dr. Bernd Rehm

---

**Aims**

*SynBio* is an international and multidisciplinary scholarly, peer-reviewed, open access journal. It publishes comprehensive reviews, original scientific research articles, communications, case reports, commentaries and editorials on all aspects of synthetic biology. Thus, theoretical and experimental articles will be welcomed. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental or methodical details, or both, must be provided for research articles. Computed data or files regarding the full details of the experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

---

## Scope

- DNA and gene synthesis;
- Synthetic transcription factors;
- Synthetic metagenomics;
- Designed nucleic acid systems;
- Genetic systems and circuit design;
- Gene optimization;
- Protein engineering;
- Designed proteins;
- Metabolic engineering;
- Viral engineering.

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

### Rapid Publication

A first decision is provided to authors approximately 18.8 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the second half of 2025)
