Message from the Editor-in-Chief

The primary objective of the *Journal of Clinical & Translational Ophthalmology (JCTO)* (ISSN 2813-1053) is to establish a forum that allows the basic science researcher to gain insight into current clinically relevant questions, while simultaneously providing clinicians with a better understanding of the underlying pathophysiology of the clinical presentations that they experience on a first-hand basis.

We look forward to publishing high-interest, peer-reviewed manuscripts covering a wide range of ophthalmic conditions, including original research papers, review articles, short communications, case studies, and commentaries. It is the intention of the Journal to encourage a robust response from the readership as it relates to these contemporary topics in order to provide a more dynamic experience that will undoubtedly contribute to the translational mission of the Journal.

Editor-in-Chief

Dr. Jack V. Greiner

Aims

Journal of Clinical & Translational Ophthalmology publishes reviews, regular research papers (articles) and communications. Our aim is to encourage ophthalmologists, vision sciences specialists and other researchers to publish their latest clinical and non-clinical research and observations on the diagnosis, prevention, and treatment of eye conditions and issues of the visual system in as much detail as possible. Therefore, the journal has no restriction on the maximum length of the papers. Full experimental details should be provided so that the results can be reproduced.

Scope

- Strabismus and abnormal eye movements
- Oncology treatment of the eye
- Cataracts and accommodative abnormalities
- Color deficiencies
- Complex surgical procedures (such as reconstructive surgery to repair trauma or birth abnormalities, anterior segment surgery, advanced vision repair, etc.)
- Corneal conditions (such as keratoconus, Fuchs' endothelial dystrophy and bullous keratopathy)
- Dry eye syndromes
- Eyelids and eye abnormalities
- Glaucoma
- Refractive surgery
- Plastics and reconstructive surgery
- Surgical procedures
- Infections of the eye and adnexa
- Inflammatory diseases of the eye
- Presbyopia
- Retinal conditions (such as macular degeneration and diabetic retinopathy)
- Lacrimal system abnormalities
- Uveitis
- Vision loss

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

A first decision is provided to authors approximately 62.3 days after submission; acceptance to publication is undertaken in 6.2 days (median values for papers published in this journal in the first half of 2025)
