Message from the Editor-in-Chief

Wild (ISSN 3042-4526) is an international, peer-reviewed, open access journal specializing in natural systems and dynamics and interactions between primary and secondary environments/species, published quarterly online by MDPI. This journal was born from the idea of mine, try to pay more attention to natural environments, or in renaturalization, to be a collector of experiences and a facilitator of exchange of different experiences in various parts of the world.

Editor-in-Chief

Dr. Kevin Cianfaglione

Aims

Wild's main objective is the publication of high-quality research with a focus on wild species and communities, primary habitats, renaturation processes, natural land, nature and human interactions and perceptions. The journal publishes reviews, regular research papers (articles), opinion and theoretical papers and short communications.

Wild deals with all aspects related to nature, including natural environments, renaturalization, restoration, wild species, ethical game, fishing, and other uses of natural resources. The journal also aims to highlight the traditions of Indigenous people that do not destroy primary habitats, integral protected areas, and the places and people symbolizing ecological ethics or (wild) nature protection and restoration. We aim to publish timely experimental and theoretical research results in a rapid and readily accessible manner. The journal strives to bridge the gap between scientific research and practical application by focusing on research studies as well as providing a platform for practitioners and land/protected area managers to share their experiences. There are no restrictions on the maximum length of the papers.

Scope

- Wild species and their habitats;
- Wild environments and biodiversity;
- Natural environment management, wild land preservation;
- Dynamics and policies of restoration and renaturalization processes;
- Interactions between primary and secondary natural environments/species;
- Management, conservation, characterization and dynamics of species in their natural habitats;
- Natural ecosystems;
- Sustainable and ethical utilization of natural resources via hunting, fishing and other outdoor pursuits;
- Indigenous peoples and foraging;
- Primary habitat issues and old-growth forests;
- Human and nature heritage, relationships, perception and conflicts.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

A first decision is provided to authors approximately 26.2 days after submission; acceptance to publication is undertaken in 6.8 days (median values for papers published in this journal in the second half of 2025)
