Message from the Editor-in-Chief

Breast Cancer Research and Care (ISSN 3043-100X) is an international, peer-reviewed, open access journal on disseminating cutting-edge research and innovative clinical advancements in the field of breast cancer published quarterly online by MDPI.

Editor-in-Chief
Prof. Dr. Kay-Uwe Wagner

Aims

Breast Cancer Research and Care is an international, peer-reviewed, open-access journal published by MDPI dedicated to advancing the full spectrum of breast cancer research. The journal serves as a multidisciplinary forum that integrates fundamental discoveries with clinical application, with the explicit goal of improving prevention, early detection, precision therapeutics, survivorship, and long-term patient outcomes in breast cancer.

The journal welcomes submissions that advance breast cancer biology and care, including original research articles, comprehensive reviews, case reports, and short communications. Other article types may also be considered when they contribute meaningfully to the field. We encourage authors to present their experimental and theoretical findings with maximal clarity and depth. For studies involving experimental work, complete methodological details are required to ensure rigor and reproducibility.

There are no restrictions on manuscript length, allowing investigators to report complex datasets, mechanistic insights, and clinically relevant observations in full. Authors may also submit electronic files, datasets, computational tools, or detailed protocols as Supplementary Material.

Scope

This journal covers the full spectrum of breast cancer research, reflecting its multidisciplinary essence. We welcome submissions on a wide array of topics, including but not limited to the following:

- Epidemiology and cancer prevention
- Molecular biology and pathogenesis
- Biomarker discovery
- Advanced diagnostics and imaging
- Multi-omic profiling (whole genome sequencing, single-cell and spatial transcriptomics, proteomics, radiomics)
- Resources (breast cancer models, cell lines, animal models)
- Therapeutic modalities and clinical management
- Metastatic breast cancer
- Patient-centered care and survivorship
- Palliative and end-of-life care

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

First decisions in 18 days; acceptance to publication in 7 days (median values for MDPI journals in the first half of 2026)
