Message from the Editor-in-Chief

Inflammation plays a central role in the fighting of infections as well as in early, intermediate and late disease stages in a variety of diseases or conditions. The aim of *Inflammation Journal* is to provide an academic platform to showcase the latest findings in the field of inflammation research. Therefore, articles that represent breakthroughs in the inflammation field are encouraged to be submitted for consideration for publication in this open access journal. We are committed to rigorous editorial standards and a fair, transparent, and constructive peer-review process that focuses on scientific quality, reproducibility, and impact.

Editor-in-Chief

Dr. Juan Pablo de Rivero Vaccari

Aims

Inflammation Journal (ISSN 3043-0348) is an international, peer-reviewed, and open-access journal dedicated to publishing high-quality research across the entire spectrum of inflammation science. It provides a multidisciplinary platform for comprehensive reviews, original research articles, short communications, perspectives, and case reports. *Inflammation Journal* focuses on the pathogenesis, progression, regulation, and resolution of both acute and chronic inflammation, including infectious and non-infectious inflammatory responses, the crosstalk between inflammation and immunity, as well as the diagnosis, treatment, and prevention of inflammation-related diseases, animal models of inflammation, and the development of anti-inflammatory agents.

Scope

The journal welcomes submissions covering all aspects of inflammation, including, but not limited to:

- Cellular and molecular pathways of inflammatory responses.
- Innate and adaptive immune cell contributions to inflammation.
- Inflammatory basis of chronic and acute diseases.
- Translational and clinical research.
- Interdisciplinary and emerging areas.
- Inflammation in infection.
- Inflammation in tissue injury, repair, fibrosis, and regeneration.
- Inflammation in aging and age-related disorders.
- Biomarkers of inflammation.
- Clinical trials evaluating anti-inflammatory interventions.
- Environmental and lifestyle determinants of inflammation.
- Inflammation in veterinary medicine and animal models.
- Computational and systems biology approaches to studying inflammation.
- Ethical and public health implications of inflammation research.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication

First decisions in 18 days; acceptance to publication in 7 days (median values for MDPI journals in the first half of 2026)
