Message from the Editor-in-Chief

Welcome to *Medical Ethics and Bioethics*, a journal that publishes peer-reviewed articles on the normative and legal problems raised by medical practice, biomedical research and health policy. The journal's scope covers clinical ethics, research ethics and research integrity, medical law and professional liability, the regulation of human biological material, and the ethical assessment of emerging biomedical technologies, including artificial intelligence in clinical decision support and research on human organoids. Conceptual analysis, empirical bioethics, research studies or case reports are treated equally within the scope, together with comparative studies of national and regional regulation and of the work of research ethics committees. Manuscripts are assigned to reviewers with competence in the specific question examined. Accepted articles appear in open access format under a CC BY license, with the copyright retained by its authors.

Editor-in-Chief
Prof. Dr. Sorin Hostiuc

Aims

Medical Ethics and Bioethics (ISSN 3043-1891) is an international, peer-reviewed, open access journal dedicated to publishing high-quality research on ethical issues in medicine, healthcare, biomedical research, and the life sciences. The journal aims to provide a platform for scholarly discussion and research that advance ethical decision-making, responsible innovation, and equitable healthcare. We welcome research addressing theoretical, empirical, and practical aspects of medical ethics and bioethics across diverse healthcare, research, and policy settings.

This journal publishes original research articles, reviews, guidelines, perspectives, case reports, and communications, but other article types will also be considered. There is no restriction on the maximum length of the manuscripts. Authors should provide sufficient details regarding their sources, methodologies, ethical frameworks, and analytical approaches so that their arguments and conclusions can be critically evaluated and, where applicable, reproduced or independently verified.

Scope

Specific areas of interest include, but are not limited to, the following:

- Foundations, methods, and education in bioethics;
- Clinical ethics and ethics of healthcare professions;
- Biomedical research, science, and healthcare innovation;
- Medical law, medical responsibility, healthcare governance, and population health;
- Humanities, culture, identity, and social justice;
- Bioethics beyond clinical medicine.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures, or use of colors

Rapid Publication

First decisions in 18 days; acceptance to publication in 7 days (median values for MDPI journals in the first half of 2026).
