

## Supplementary Information

**Figure S1.** Effect of SCCEs on SM production in *A. clavatus* grown for 72 h in FM1. Values are x-fold of control.\* indicates significant increase and ° means significant decrease compared to the control.

**Figure S2.** Effect of SCCEs on SM production and expression of the related PKS-gene in *A. clavatus* grown for 48 and 72h in FM2. Effect of SCCEs on cytochalasin E production and *ccsA* expression (panel **A**), on patulin production and *patK* expression (panel **B**) and on pseurotin A production and *psoA* expression (panel **C**). Values are x-fold of control. \*indicates significant increase and °means significant decrease compared to the control.
